DETAILED ACTION

This office action is in response to the Amendment filed 28 October 2005.

It is noted that in the claim listing of the Amendment filed 28 October 2005, claims 1-19 are noted as "Cancelled Without Prejudice". On page 4 of Applicant's remarks, it is noted that claims 1-20 are cancelled (line 2). Therefore, the notation on the claim listing is believed to be a typographical error. To obviate any future confusion, the examiner will note below in the Examiner's Amendment section that claims 1-20 are cancelled.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings in the file are informal in nature and contain various stray marks in several figures. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

Art Unit: 1732

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Hawkins and Greg Gardella on 10 November 2005.

The application has been amended as follows:

Claims 1-20 are cancelled.

Claim 21, line 2, the following phrase is inserted between "rotomold" and ";;"

--and subsequently closing the rotomold--

Allowable Subject Matter

Claims 21-26 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record neither teaches nor suggests the claimed method for rotationally molding a plastic part including adding resinous material and reinforcing elements to a rotomold and subsequently closing the rotomold and disposing the reinforcing elements as embedded throughout the wall of the molded part and projecting from the inner surface of the molded part.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1732

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent is cited to further show the state of the art with regard to rotomolding in general:

U.S. Patent 5,527,574 to Iannazzi et al.
